

WHAT IS CLAIMED IS:

1. A single-sided paper phenolic resin copper-clad laminate composed of a phenolic resin impregnated paper base having copper foils laminated on and resists applied on a face side thereof, wherein resists formed of a same material as the resists on the face side are applied on a reverse side of the phenolic resin impregnated paper base.

2. A single-sided paper phenolic resin copper-clad laminate as claimed in claim 1, wherein a position and configuration of the resists applied on the reverse side of the phenolic resin impregnated paper base match with those of the resists applied on the face side of the phenolic resin impregnated paper base.
